

Grand Week-End Program at Palace Theatre

Feature Picture for Friday and Saturday, Sept. 27 and 28. GRETA GARBO in

"SINGLE STANDARD"

A splendid attraction which has pleased thousands wherever shown

Mine Rescue and First Aid Contest

Teams From International and McGillivray Mines Will Enter Competitions

The contests will be held on Saturday at Blairmore on the grounds close to the Arena, and the following teams will compete:

Mine Rescue Contest—Carmore, Bellevue, Hillcrest, Greenhill, McGillivray, International.

First Aid Contest—Carmore, Hillcrest, Bellevue, Greenhill, Mutz Mine, Inernational, McGillivray, Coleman Town team.

If the weather is unfavorable the Arena will be used. In the Arena the first aid work will be held. The mine rescue teams will take down and reassemble their apparatus and inspections will be made prior to going to the smoke room. If the weather is favorable all work is favorable all work will be done outside.

Captains of teams will draw at 8:30 a.m. prompt for time and place to compete.

Good prizes are being given. The beautiful large cup given by McGillivray Creek Coal & Coke Co. Ltd. will be presented to the team winning first place in the first aid contest, to be held by them for one year or until the next contest is held in this district, when it will again be competed for.

Demonstrations of mine rescue equipment will take place about 3 p.m.

At 5:30 p.m. a football game will be held in Blairmore between Hillcrest and Bellevue teams for the benefit of John Milnes of Bellevue, until recently one of the leaders in first aid work, but now unable to follow any employment owing to sickness.

At 8 p.m. a smoker will be held in the Tea Kettle Lun, when the prizes will be distributed to the winners. Admission to the smoker will be by invitation card only.

Heard Calgary Service

The service broadcasted from the Arena at Calgary on Sunday was heard in St. Alban's church over the radio, kindly loaned by Mr. A. M. Morrison. Though static interfered with the reception, most of the service was clearly heard, especially the musical portions of the service, and the benediction by Archbishop Matheson. The main address, by the Bishop of Winchester, was not plainly heard, owing to the hesitating style of the speaker, and his voice apparently not carrying well, so that a great deal of its effect was lost.

Jim McCartney is hobbling along with a foot swollen so badly and causing him to say "Ouch" every time he jars it that you would imagine he was suffering with gout. Jim says it is worse than that. A big chunk of coal fell while he was working in the mine.

IN MEMORIAM

In Loving Memory of Agnes, beloved wife of J. C. Ferguson, who died on Sept. 18, 1928. Inserted by her husband and daughter.

President and Directors on Tour

Inspecting hotels, resorts, experimental farms and properties of the Canadian Pacific Railway, and great mining and industrial plants and agricultural conditions on the route of their journey across Canada from Montreal to Victoria and return, President Beatty and directors of the railway are here shown on their arrival at the North Toronto station. From left to right the photograph shows Rt. Hon. Lord Shaughnessy, W. A. Black, Sir George Goernau, of the Civil Service Commission, E. W. Beatty, chairman and president of the system, Dr. H. A. Beatty, chief surgeon for the C. P. R. Ontario district, Sir Charles Gordon, Ross H. McMaster, P. E. Meredith and Dr. Charles F. Martin, dean of the faculty of medicine, McGill University.

He's a Slippery Cuss

Dan Probin, the man arrested for stealing from hotel rooms in various towns last spring, and who was caught at Cranbrook, but who escaped from custody, was later arrested at Portland, and lodged in jail at Seattle to await deportation to Canada.

Probin was in charge of Deputy United States Marshal Frank Anderson when he broke from the grasp of that officer and mixed with office going crowds on the street in the rear of the federal building.

A manhunt was begun at once. A rush call was sent to Portland for photographs and finger prints of the fugitive, and authorities of the Pacific Northwest cities were notified.

He was to be arraigned before a United States commissioner on a charge of illegal entry into the United States when he broke away.

Rebekahs Fine Social

The anniversary social and dance held by the Rebekah lodge last Friday evening was very successful, and there were sixteen tables in play at the whist drive while forty more came later for the dance. The whist prizes were won by Mrs. Nielsen and Mrs. M. J. White, and the gent's by Jack Nash and Mrs. Wes. Vincent, the latter playing as a gent. For the dance Mrs. Altmatt's orchestra of four players gave a splendid program, contributing greatly to the success of the evening.

Hooks of Steel

And so, those of you who want your advertising to build business and grapple the hearts of customers with hooks of steel, don't forget

Talk to them in their language;

Tell them what they want to know;

Play to their ideals;

Show enthusiasm for their interests;

Visit at their doorstep.

All of which is quite elementary and therefore habitually overlooked.

Holding Conference Blairmore To-Night

Problem of Seasonal Employment to be Discussed at Meeting—G. G. Coote, M.P., Attending

Frank Wheatley, President of the Mine Workers Union of Canada, has been in the district the past two days, completing arrangements for the conference to be held to-night on the vital subject of unemployment in the mining towns. During the week a partial survey has been made to ascertain the amounts being carried by retailers in credit accounts, which cannot be liquidated in the comparatively short season of employment. The object of the conference is to find if a solution can be suggested to alleviate the existing condition.

Besides union officials, it is reported that invitations have been extended to representatives of the mining companies to attend, to engage in a round-table discussion. Mr. Wheatley has taken the matter up with Premier Brownlee, who stated that he would discuss the matter with President Beatty on his recent visit to Edmonton.

Patient Hunters

Jack Wilson and Jimmy Yates spent four days last week hunting in the vicinity of Racine creek. They braved the cold nights, camping at quite a high elevation, in the hope of bagging some big game, but luck was not with them. One day they laid for eight hours on a rocky shelf waiting to get a shot at a mountain goat about a thousand feet above them, but the goat was too wise to expose himself so that he could be shot, and nightfall caused the disappointed hunters to give up the long vigil. They made the trip by foot, packing in their supplies in pack-sacks, and returned about 4 p.m. on Sunday, having walked twenty miles that day. Both had a fair growth of whiskers after their stay in the mountains.

D. O. Macko returned on Tuesday from Calgary, after spending a week in hospital.

Presented With Club Bag

John Bell was presented with a fine leather club bag at a smoking concert last Friday evening, held in the K of P hall. The occasion was in honor of "Jock" winning the Western Canada quoiting championship, and the prime mover in organizing the affair was William Holley, who collected donations totalling \$96, which included a donation of \$20.00 from Distributors Ltd. Dave Gillespie was chairman and those contributing to the program were P. Smith, W. Smith, Edgar Thomas, W. Holley, Ernie Hill, Ephra Hill and others. Jack Hogan made a fine speech, telling of his own prowess as a quoiter, and that he could lick any man in the Crow's Nest Pass at the game. He extended to the champion his hearty congratulations which were vociferously endorsed by the company assembled, and further endorsed by another little round of refreshments, which didn't appear to do anybody any harm. Mr. Bell thanked the gathering for the honor accorded him, and hoped to be successful again next year in bringing back the highly-prized silver quito to Coleman.

The wedding of Beatrice Monica Adam, of Calgary, formerly of Coleman high school staff, and Frank Lynch Staunton, of Lundbreck, took place on Saturday at Calgary, at the Church of the Redeemer. A large number of invited guests attended the ceremony. Miss Harriette Goosie and Miss Florence Cox motored from Coleman to attend the wedding and reception held at the home of Mr. and Mrs. J. G. Adam, parents of the bride. The newly-wedded couple left on an auto tour to the coast, and on their return will reside at Lundbreck.

Harry Gardner, who during the summer has been employed as an assistant to L. Lindoe, surveyor at the International mine, left on Saturday last for Edmonton, and will resume his studies in mining engineering during the fall and winter months. He took an active part in the baseball team and was keenly interested in all lines of sports, besides being a mountain climbing enthusiast.

"Talkies" Are Coming

The Palace Theatre intend to give their patrons the latest in picture entertainment, having entered into a contract for installation of equipment here. Sound films will carry their own musical score, thus greatly improving the form of entertainment, and Coleman patrons will enjoy the same high standard of attractions as the cities. Navigator Dow is to be commended for his enterprise in making this heavy investment and his effort to provide high-class entertainment deserves the support of the public.

Local News

On Saturday last a visitor from Corbin, reported six inches of snow having fallen there.

The Charbonnier cup will be given to the first winners in the mine rescue contest.

Mrs. John Hamilton of Lethbridge is visiting this week with Mrs. R. Gillis.

Local news items of visitors, social events and other interesting events would be welcomed by The Journal. Phone 2469.

Mr. and Mrs. Howarth and son John, were visitors to Calgary the guests of Mr. and Mrs. S. Brocklehurst.

Mr. and Mrs. F. Peterson left for Vancouver on Monday, Sept. 16, after spending a few days with Mr. and Mrs. M. Wilson, while on their honeymoon.

R. Gardiner, of Calgary, representing R. G. Dunn & Co., was in the Pass towns this week on his anti-trip compiling information for Dunn's reports.

Ed Driver returned this morning from High River, the weather having caused a temporary shut-down on the drilling of an oil well he was engineering on. A depth of 1,000 feet had been reached.

Malcolm McCallum and Marion and Belle McCallum, visited their sister, Mrs. Lindoe, during the week, driving up from New Dayton. Malcolm will enter on his fifth year of studies for the medical profession, having obtained his B.A. degree.

Radio is now taking the attention of people, with the advent of cooler weather. The improved models now being shown at local dealers are creating considerable interest, especially the combined radio and gramophone sets. Those interested should call at the dealers advertising in The Journal for a demonstration.

Church Appreciates Kindness

The thanks of the vestry of St. Alban's church is extended to Mr. A. M. Morrison for his kindness in loaning a radio set to receive the broadcasting service from the Arena, Calgary, last Sunday evening, this being the occasion of the mass meeting marking the conclusion of the provincial Synod of Rupertland.

Sheep Returning to Lethbridge Exp. Farm

Nearly 2000 Head Being Shipped After Season's Grazing on Mountain Range

"Sandy," the knowing leader of the flocks of sheep belonging to Lethbridge Experimental Farm, will entice the big family on to cars which will convey them back this week to their winter home on the prairie. Throughout the summer the flocks of Crown Nest Mountain have been the range of the sheep, under the care of George Walker and H. M. Dingwall, and it has proved a very good grazing ground since 1919, when Supt. Fairfield tried the experiment of transporting the sheep from the prairies to the mountains for summer grazing.

Arthur Newman, assistant superintendent in charge of livestock at Lethbridge Experimental Farm, drove up by car on Tuesday, accompanied by his wife. He will supervise the loading of the sheep. He stated that being free from open grass, mountain grazing has advantages over the prairie, and it is probable that next year a number of farmers will pool their flocks for grazing in the mountains. Another advantage is that water is always available, whereas on the prairie difficulty is experienced at times, and the cost of irrigated land is too high to permit of its use for grazing purposes. The stubble fields in the winter may be utilized for grazing.

Mr. Walker will return to Lethbridge, and Mr. Dingwall has been engaged to take charge of the thoroughbred sheep branch of the Prince of Wales ranch near High River.

Log Stealing Proves Expensive

Logs, Hay and Other Materials Stolen From Logging Contractor Secot near Coleman

\$17.60 is a high price to pay for two logs as a man from Grafton-town discovered last week when he was charged with theft. Mr. Secot, who is hauling logs for the Greenhill mine, reports losses of hay, logs, chains, and a set of harness. The loaded hay had not been left twenty minutes on the road for another team to pick up before it was stolen.

The case with which logs or other material left around may be stolen tempts people whose sense of right and wrong is not what it should be, but the police investigations usually bring guilty parties to court if suspicion is aroused on the disappearance of material.

An employee of McGillivray Co. was this week fined, with the costs of the court, \$246 for the theft of lumber, which he had used in a building on his land. It is reported that about 2,000 feet were stolen.

Attend the Palace theatre this week end for special feature.

Every tiny leaf is a storehouse of flavour

'Fresh from the gardens'

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had, as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions this kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statement of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for war purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and hostile nationalism rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries, and to raise the standard of living of the masses of people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of commerce. This is the age of big business, the age of mechanics, mass production, and of endeavour to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

Premier Borden's proposal for a United States of Europe is economic rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

Accelerated Schedules Feature C.P.R. Fall, Winter Table

New Schedules To Be In Effect Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the change of seasons, and I cannot praise it too highly. I was troubled with heart flashes and my limbs were heavy and I could hardly walk to do my farm work. I saw in the newspapers your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it does for me. I am willing for you to use my letter if you choose."—Mrs. D. B. Ferns, Wilton, Ontario.

Ask Your Neighbor

which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

Sheep Ranching Expanding

Industry is Showing Promising Development In British Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board on which Darwin worked while writing his famous theory of evolution.

The chrysanthemum was introduced into England from China about 1780.

A Real Necessity

"Don't Get Excited" Club Would Be a Boon To World

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is a don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and not excited enough over the big ones. Agitation, loss of temper and surrender of self-command over the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more can be accomplished through poise and placidity than through effervescence and seismic phenomena.

If a don't-get-excited club could be so organized as to conserve all the human energy that is now wasted through needless excitement it would mean that mankind had reached the suburbs of a new era.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but it is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for this purpose nothing else can equal Dr. Williams' Pink Pills, which from first dose to last build up new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Pueblo, N.S., tells what these pills did for him. He says:—"I had an attack of acute rheumatism in my right arm and hand, and it was so bad that I could not do the least work, and any movement caused great pain. I was under the care of a doctor but it did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes there was no doubt they were helping me. I took altogether about a dozen boxes when it was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day, and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills. You can get these pills through any medicine dealer or by mail at 50 cents a box from Dr. Williams' Medicine Co., Brockville, Ont."

Greatest Wheat Exporters

Canada Stands At Head Of The List As Exporter Of Wheat

Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 258,027,278 bushels. The United States came second with exports of 168,307,000; Argentina, third with 155,258,000; and Australia fourth, with 80,980,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 479,665,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Expeller will protect the children from these distressing afflictions.

People in the United States use up more than a million lead pencils each year.

Mystery Of Steel Hardening

Steel Now Produced That Is Harder and More Ductile Than Damascus

Mystery and secrecy that for centuries shrouded romance over the art of steel hardening in America, has almost entirely disappeared, according to W. H. Elman, secretary of the American Society for Steel Treating.

The famous blades of Damascus, tempered, says legend, by being run through the body of a slave, hold no secrets for modern swordsmiths. Steel is produced now that is harder than Damascus' and possibly more ductile.

Dr. W. S. Carnes, a metallurgist, of Canton, Ohio, has produced a sword which he can shave, and yet so ductile that he can wind it several times around his arm. It is of carbon vanadium steel. As recently as 10 years ago, some of the processes of hardening steel were carried on in gloomy and secluded basements.

The officiating smith even wore a high silk hat, muttered abracadabras and made passes over the treating tank.

Potatoes played an important role. A spit was set across the water. Where the potato came to rest was the best place to plunge the white-hot steel. During the war, a great stir was made when a group of steel treaters in Poughkeepsie, N.Y., could not obtain water from Sheffield, England. They thought this had given Sheffield steel its quality which steel treaters the world over had tried to imitate.

Today the process of steel hardening has become automatic with colored light flashing, the instant steel assumes the proper hardness.

A Corrector Of Pulmonary Troubles—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and the Oil is recommended to all who suffer from these disorders. It will obtain water from the bronchial tubes.

Had Been There "Travelled!" said a sailor in a train to a passenger who had questioned him. "I should think I have. I've been all round the world; over an under it, too. There ain't many people I don't know the inside of."

"Why you must know a lot about geography."

Increase In Water Power

The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 200,000 h.p. added to the Dominion's total within the half year.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Will Establish Sanatorium

The government of Manitoba has decided to devote the \$250,000 provided at the last legislature, to establishing a sanatorium for tuberculosis children in Winnipeg.

Stop Colds with Minard's Liniment.

Applies imported into England from Australia must in the future measure not less than two and one-quarter inches in diameter.

Hindu surgeons in early times used more than 100 different surgical instruments, and performed difficult operations.

A penalty for failing to vote in elections is exacted in Czechoslovakia.

Daring Stunt Flyers

"Four Musketeers Of the Air" Defy Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McGowan, and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Siskin pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performance was regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at around 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, the motors nearly stopped, the planes gradually fall over backwards and fly for some distance upside-down.

Postal Revenue

Now On A Level With What It Was Three Years Ago When Letter Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1929, the revenue was \$31,025,000, and for the fiscal year ended March last, \$31,170,000.

A census is to be taken in more than 200 countries and colonies next year.

Rubber can be obtained from more than 300 varieties of tropical trees.

All These Advantages For Farm Construction

For both old and new construction Gyproc gives more advantages than any other material. Makes dry, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

NO PLEBISCITE FOR ONTARIO SAYS FERGUSON

Toronto.—Launching the first campaign of his political campaign, Premier Ferguson announced before a monster gathering here that there would be no plebiscite under his administration on the Ontario liquor control act.

"There will be no plebiscite so long as the Conservative party is in power," Premier Ferguson exclaimed, "and I happen to be the head of the government. We are quite prepared already to submit our record to the public to have it criticized and discussed, and we must be prepared to accept our responsibility."

"He went on," the premier stated, "does not say the legislation is perfect. Time and experience are going to demonstrate its weakness. The Ontario liquor control act was admitted to be probably the best in the Dominion. It was administered by a very capable man."

"Let us try and improve any defects in the act as we go along so that any evils which may exist may be eliminated," Premier Ferguson declared.

"I am opposed in principle to plebiscites," the premier stated. "They are contrary to the principle of responsible government. A plebiscite is a refuge behind which a government may hide from responsibility."

Premier Ferguson had caustic references for W. E. N. Sinclair, general leader, on the liquor question. "I see," the Ontario premier declared, "Mr. Sinclair is a bit wobbly in his effort to follow the path of prohibition. I am not quite sure where he is or where he will land in that respect. It appears to me the position he has taken is, that the people have approved of the legislation; but Mr. Sinclair does not want the Ferguson Government to administer it. He now says the Ferguson Government should not administer it and to let those administer it who do not believe in it."

Wireless Service Soon
London, Eng.—Beam wireless service direct from England to Australia will be available to the public in the course of a few weeks. This is a new service in which the British post office has been engaged for many months and experimental tests have reached the final stage. Individual messages already have been successfully transmitted in a prolonged series of trials.

Employment On Increase
Ottawa.—Employment in Canada at the beginning of August showed a further marked increase, according to statements tabulated by the Dominion Bureau of Statistics from 6,840 firms whose payrolls aggregated 1,097,817 persons as compared with 1,070,817 persons on July 1. The record is unusually good for this time of the year and the index number at 127.8 is a record for all time.

Income Tax Collections
Ottawa.—Income tax collections are mounting. In the five months ending August 31, collections totaled \$86,392,142, an increase of \$8,311,918 over the same period in 1928. In August alone, according to the National Revenue Department's figures, collections were \$850,427, as against \$822,100 in August of last year.

Will Represent Japan
Tokyo.—Japan's first step in the new movement for naval disarmament was announced recently when the navy ministry ordered Commander Tamon Yamaguchi, of the naval general staff, to proceed to Washington, to join the Japanese embassy staff there, preparatory to the proposed conference for naval limitation.

Earthquake Recorded
Saskatoon, Sask.—The seismograph at the University of Saskatchewan, here, recorded a severe earthquake shock Sept. 17th. It was the most severe registered here in many months. The location of the earthquake could not be determined until compared with records from other points.

Army and Navy Veterans
Quebec.—The annual convention of the Army and Navy Veterans Association opened here with more than one hundred delegates from various parts of Canada in attendance. Brig.-Gen. Hon. W. Griesbach, of Edmonton, Alta., presided.

W. N. U. 1504

For Compulsory Pool

Aaron Sapro in Favor of Marketing System Without Limitation
Estevan, Sask.—"I am for co-operative marketing without reservation and without limitation, but above all I am for control of the commodity that the farmers raise by the farmers, who raise it, and I am for the absolute elimination of even part of that control by those who have a financial interest in breaking down your great pools. I am for co-operation as a means to an end, that your own wheat by the farmers who end being the absolute control of raise it in whatever technical method they think is the best method of control."

Before 700 farmers of the districts tributary to the town of Estevan, Aaron Sapro, America's most famous co-operative farming advocate, gave expression to these sentiments when, under the auspices of the local lodge of the Saskatchewan section of the United Farmers of Canada, he opened the first gun in the campaign now being started in favor of a sentiment of one hundred per cent. pool by legislation.

Without equivocation of any kind, Mr. Sapro announced himself as being wholly in favor of one hundred per cent. pool by way of legislation, and in the course of an hour's address gave reasons why such legislation should be sought, why the farmers of the province should market all their grain through a single control, and why those who are now outside the pool should be compelled by way of legislation to place their products through the single marketing organization.

Four questions were outlined by Mr. Sapro as the basis of his address: first, do the farmers generally understand what is meant by the term "one hundred per cent. pool"; second, why was he brought to the province to advocate the method; third, what objections are raised to it; fourth, why are the reasons for legislation greater than those against it.

H.B. Line Now Ready

But Regular Trains Will Not Be in Operation Until Next Spring

The Pas, Man.—The Hudson Bay Railway is now in shape to allow regular trains to be run to Churchill with safety. It was learned here in official railway circles.

The final two miles of ballasting of the first of the four completed this week, placing the road in condition for regular traffic. However, passenger trains will not be run to the Bay until the spring, according to a recent decision in Ottawa. Railway quarters deny the report published in the local press that the muskox train had completed its first run to Churchill. The train completed its run at Mile 412 as usual. When the train left here recently, it included the private cars of Major J. G. MacLachlan, district engineer, and of the P. H. Campbell, general superintendent of construction, western region. However, the business cars were taken from Mile 412 to the Bay on a work train. The two officials made an inspection of the Flin Flon and reported everything in order.

Imperial Trade Conference

Movement Under Way To Formulate An Empire Trade Policy

London, Eng.—It is understood that attempts are being made to organize an imperial commercial conference to be held prior to the meeting of premiers of the British Empire at the Imperial Conference in 1930.

It is proposed that each Dominion shall appoint a small delegation representative of the various interests, agriculture as well as business. The delegation will meet in London three months before the premiers and endeavor to hammer out an Empire trade policy which if agreed upon will be submitted to the premiers as a guide in their deliberations.

Canada Will Sign
Ottawa.—Canada will certainly sign the optional clause in the statutes of the world court of international justice, Premier Mackenzie King says. Mr. King was asked in regard to discussions which are going on at present in Geneva with respect to the signing of the clause by members of the British Empire.

Leads Opera In Germany
Berlin.—Albert Einstein, noted conductor, led Boris Godunov at the State Opera, as the first Englishman to wield the baton at the Berlin Opera since Sullivan conducted the Mikado many years ago. Mr. Coates was warmly received by the German audience.

Police Return Young Doukhobors To Home

Children Made Escape From Institution At Vancouver

Vancouver.—Eight Doukhobor children, seven girls and a boy ranging in age from eight to 18 years, escaped from the children's aid home here, and set out to join their parents at Oakalla jail. In response to an alarm from the matron of the institution police located the youngsters and returned them to the home.

The children were brought here at the same time that more than 100 members of the Sons of Freedom, a sect of Doukhobors, were brought to jail here to serve six months sentences for taking part in a nude parade at South Slokan, B.C.

Entertained By Royalty

Premier MacDonald and Daughter Isabel Guests At Sandringham Castle

Sandringham, Eng.—King George and Ramsay MacDonald sat together in the drawing-room of Sandringham Castle tonight and talked about whatever it is that a monarch and premier discuss when the latter is on the eve of a historic journey to the United States.

The Prince of Wales looked in for a short time before leaving the castle. The premier and his daughter Isabel were house guests tonight of their Majesties and will probably motor back to London tomorrow. Mr. MacDonald also had a long interview with the King this afternoon while Miss Isabel was talking with Queen Mary.

THOMAS PLEASED WITH HIS RECENT VISIT TO CANADA

Liverpool, Eng.—"I am completely satisfied with the results of my visit," declared Right Hon. J. H. Thomas, Lord Privy Seal and Minister of Employment, on his return from a visit to Canada. "I hope and I feel that it will contribute towards a solution of the unemployment problem of this country this winter."

"I promise to meet representatives of all business interests which can do business with Canada, so the necessary steps can be taken to give practical effect to my efforts. Canada will take coal and steel from Great Britain which she at present takes from other areas."

"I have not asked Canada to take from us things she produces herself, but I did ask something on account of Britain being the largest buyer of wheat from the Dominion," Mr. Thomas went on. "Canada," he declared, "admitted the force of what he put forward."

"Although, as I say, I shall meet the business organizations of the country, I say once again, as I did when I took office—there can be no infallible unemployment remedy produced artificially. What we want for that are customers, and these I have done my best to secure," Mr. Thomas added.

Young Aristocrats Sail

Standing on each side of Captain J. N. Griffiths, skipper of Canadian Pacific steamship "Montcalm" (Hon. John and the Hon. George Rodney, aged 9 and 10 respectively, had just made the 2,000-mile trip from their father's ranch at Fort Saskatchewan, Alberta, unaccompanied across Canada under the care of Canadian Pacific Railway officials. They are on their way to school in England. The elder is eventually destined for Eton, and the younger will enter the navy via training ship at Dartmouth. Their father is the descendant of the famous British Admiral who won the great sea fight at Cape St. Vincent in 1780.

PROMINENT FINANCIER

Sir Robert Bothy, prominent financier, of London, England, who is making a tour of the Dominion with Alfred Sheppard, another British capitalist, with a view to looking over the various industrial and financial institutions here.

Guiding Planes By Remote Radio Control

Aero Club Given Glimpse Into Future of Air Transportation

Philadelphia.—Aeroplane speed of 410 miles an hour and planes navigated without a pilot aboard through the medium of remote control by radio were glimpses into the future given to members of the Aero Club of Pennsylvania, and the Rotary Club, by speakers at a joint meeting here, it was G. E. Toews, chief engineer of the Aeronautical Laboratories at the navy yard, who in a technical address discussed speed possibilities. A speed of 416 miles an hour is the maximum which can be delivered by any known present day motor, he said, "although Britain may have an engine up her sleeve" larger than any yet constructed.

Edward P. Howard, chief of the air regulations division of the United States Department of Commerce, disclosed that an application has recently been made for the licensing of a pilotless machine to be navigated by radio impulses.

Marler Presents Credentials

New Canadian Minister To Japan Received By Emperor

Tokio.—Hon. H. M. Marler, new Canadian minister to Japan, presented his credentials to the Emperor Hirohito. Mr. Marler rode in an automobile of the Imperial household from his hotel to the palace. The ceremony was brief. The foreign minister and minister of the house of lords were present. Japanese Minister Tokugawa also was given farewell audience by the Emperor, prior to his sailing for Canada on the "Empress of France."

Prince Purchases Plane

London, Eng.—The Prince of Wales has bought a two-seated De Havilland Gipsy Moth aeroplane, paying \$3,500 for it. It is for his private use, and is equipped with dual control so he can take control himself during flights.

British Premier May Call Power Conference

Report Says Invitations Likely To Be Issued Shortly

Washington.—Invitations to the five-power naval conference proposed to be held late in January will be issued by Premier Ramsay MacDonald in the near future, but the exact time remains to be determined.

This was learned here authoritatively recently, and with it came the further information that there would be no joint invitations on behalf of Great Britain and the United States as has been suggested in some quarters. Secretary of State Henry L. Stimson, said published dispatches emanating from London, that Premier Ramsay MacDonald already had sent invitations through the British embassies at Tokio, Paris and Rome, were without authorization and entirely inaccurate.

The invitations from the British government will go to the United States, Japan, France and Italy, with all five expected to participate in the conference which it is now proposed shall be held in the British capital.

Considerable preparatory work must be done before the invitations are sent forward through the British embassies. It may be that action would be deferred until after Premier MacDonald has held his conferences with President Hoover, in Washington, early in October, on points still in controversy between the United States and Great Britain on the cruiser question.

Making Trip To West

Premier King To Make Short Visit In October

Ottawa.—Premier Mackenzie King proposed to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west. Details of the itinerary for the trip have been somewhat held up owing to lack of information as to just when Premier Ramsay MacDonald was coming to Ottawa. It has now been settled that Mr. MacDonald will be in the capital shortly after the fifteenth of October, and Mr. King's trip will begin after the departure of the British prime minister.

Damage To Chinese Property Enormous

Government Estimates Cost Of Russian Raids At \$25,000,000

Shanghai.—The Chinese National Government estimated damage to Chinese property from Russian raids of Manchurian border points at \$25,000,000, according to a Kuomintang semi-official agency despatch.

For three months the 2,500-mile Russo-Chinese border between Manchuria and Siberia has been the scene of sporadic fighting, the trouble arising over Chinese seizure of the Chinese Eastern Railway administration from the authority of the U.S.S.R.

FOR CONTROL AND LIMITATION OF THE DRUG EVIL

Geneva.—The British delegation at the League of Nations assembly has presented a proposal designed to bring out an international agreement for control and limitation of production of heroin, morphine and cocaine. The move was regarded as representing a complete reversal by the Labor Government of the late Baldwin Government's attitude in refusing to enter an agreement seeking to limit manufacture of narcotics.

The new British position was announced to the assembly's committee on social questions by N. Baker, member of parliament. The British recommendation is that the League Council invite the governments of countries in which narcotics are manufactured to confer together as to the possibility of reaching an agreement on the total amount of each of the various forms to be manufactured annually and as to the quota of each that those countries should manufacture. The new attitude adopted by Great Britain brings her into accord with the attitude of Canada, the United States and Italy.

By the British resolution initiative in calling a conference of the States is placed in the League's Council.

SHOULD HOLD EXPORT GRAIN FOR BETTER PRICE

Ottawa.—Nothing should induce the Canadian farmer to move his grain overseas unless he receives a proper price. This is the position taken by E. B. Ramsay, chairman of the Board of Grain Commissioners.

"There are sufficient storage facilities in Canada," Mr. Ramsay said in an interview here, "to take care of this year's crop as well as the large hold-over from last year. If there should be any congestion it will likely be only temporary."

"The welfare of all Canada depends on the farmer receiving a proper price for his grain," Mr. Ramsay said. "There has been some resistance overseas to see the figures demanded, but this should not discourage the farmer in his desire to obtain an equitable return for his crop."

There was every indication that although this year's crop would not be a large one, it would be the best on record from a grading standpoint. "The bulk of the crop is grading No. 1 and No. 2," Mr. Ramsay continued. "There is so little of the lower grades that the chief inspector has not enough of No. 4, 5 and 6 to make up composite samples for grading purposes."

The chief commissioner emphasized the desirability of regulating the flow of wheat out of Canada. "If all the crop is moved within a few months it necessitates the rushing of a large number of freight cars to western points with higher overhead as a consequence," he pointed out. "If railway companies have to provide for a sudden demand and cars are idle at other times of the year, there is sure to be a higher carriage rate."

Stabilization of grain prices from year to year is essential to the welfare not only of the western farmer, but to Canada as a whole, he declared. The western farmer purchases from the eastern manufacturer and stable and reliable prices for financial prosperity. One encouraging sign, Mr. Ramsay said, was that borrowings in the West had been greatly reduced in the last few years, and western banks were more and more able to finance the farmers from their own deposits.

The Hudson Bay route will be as important from the standpoint of imports as from exports, Mr. Ramsay declared later, in an interview. Possibly the new route would have the greatest value in reduced transportation rates on imports for the western farmer. British manufacturers would be in a better position to compete in prices and a pronounced increase in intra-empire trade would result.

"In my opinion," Mr. Ramsay said, "the Hudson Bay route should be regarded as a channel for bringing overseas products to the west. On their return voyages the boats will, of course, carry western grain."

"Not only will the Canadian farmer get a better price for his grain in the North-western United States will be able to bring British goods in under bond, escaping the heavier railway charges from Atlantic ports. Canadian transportation facilities would have the benefit of carrying out-bound United States products as well. Hard spring wheats from North Dakota, Montana and Idaho are ready to market at the time navigation will be opened through Hudson Strait. Shippers across the border are sure to take advantage of the lighter charges through the northern port."

Mongolians Mobilize
Tokyo.—Japanese press agency reports state that the outer Mongolian Government is said to have mobilized all men between the ages of 20 and 40, and has ordered two cavalry divisions commanded by Soviet agents to move to the frontier. The report adds that preparations have been made to move 50,000 troops in accordance with developments in the Russo-Chinese situation in Manchuria.

To Confer With Hon. Forke
Ottawa.—Hon. George Hoadley, Minister of Agriculture, is in the capital for a conference with Hon. Robert Forke, Dominion Minister of Immigration. While the subject up for discussion was not officially made known, it is understood certain phases of the employment of agricultural laborers in Alberta are to be discussed.

More than 1,000 American citizens are living in South Africa.

Arabia has only one automobile to every 75,000 people.

The 1930 McLAUGHLIN -BUICK

New Road shock Eliminator .. and New Steering Gear

make McLaughlin-Buick the easiest car in the world to drive!

Imagine being able to travel the roughest road at any speed with the greatest ease and comfort! Such are the fine results of two matchless new quality features in the 1930 McLaughlin-Buick—a wonderful new frictionless steering gear, and the new McLaughlin-Buick steering shock eliminator! The steering shock eliminator absorbs jolts and jars and prevents their transmission to the driver's hands.

The new McLaughlin-Buick steering gear, of the effective worm-and-roller type, assures instant, effortless response to the driver's every wish. Drive this new McLaughlin-Buick. Test these twin features of comfort which make the new McLaughlin-Buick the easiest steering automobile in the world.

NOTES AND COMMENTS

The value of publicity is fully appreciated by men of vision and action. On Sunday a mass service was held in Calgary. An English bishop preached the sermon, and the benediction was pronounced by Archbishop Matthews. Through the medium of the radio, the voices of these men were heard by thousands. The following day the Calgary Herald carried a complete page of news of the event. Another instance of a great social service organization, making splendid use of publicity, is the Salvation Army. General Booth started publication of the War Cry on an old press that was a heart-breaker. The War Cry is now published in several countries where the Army is carrying on. The visit of General Higgins to Calgary was made the occasion of another full page of news in the daily newspapers. While these efforts of religious organizations are made with the prime object of extending their influence, and carrying the word of God to all the world, yet the great aid of publicity cannot be overlooked. The leaders in these movements create news, which the public looks to the newspapers to record.

This in itself is a splendid form of publicity. In a mercantile sense it would be considered advertising. There is a moral to be learned from it by many a business man. It shows that if an individual accomplishes something that stands out above the ordinary, which shows an effort to render a service not with a selfish point of view, but because of sincere enthusiasm, he will not have to seek publicity, for his own works will command publicity.

The importance of a local board of trade or chamber of commerce is at times overlooked by those who do not truly vision its usefulness. Major W. H. Wood, manager of the chamber of commerce at London, Ont., recently made the following statement in welcoming the annual convention of the Canadian Weekly Newspapers Association to that city:

"The Canadian Weekly Newspapers Association and the modern Chamber of Commerce have much in common. You reach out over the Dominion and to the furthest most recipient of your newspapers. The Chamber of Commerce, which is a British movement, functions for the entire community, and that community may be local, county, district, provincial, Dominion, Empire or world-wide in its scope since the local unit, as a community institution organized for community building, through its various affiliations, is part of a universal organization."

When President Beatty of the C. P. R. travels over his railway, everything moves quickly, much more so than is the rule with the ordinary express train. He has many points to visit when making an inspection tour, but when he is on the train, regular schedules go by the board as far as running time of his special is concerned. He came through Coleman on Monday. His coming was heralded by shrill blasts of the locomotive's siren as it rounded the curves on its way from Crows Nest to Lethbridge, and the special of private coaches passed through like a streak, so that even a close observer could barely distinguish anybody on the train. The small boy seeing the finely appointed train pass through, might well murmur: "Gee, ain't it grand to be a president!"

A firm in India manufacturing sporting goods, wrote to the local Board of Trade asking to be placed in touch with the local dealers. The paper their correspondence is typed on is watermarked "Made in Norway." At first thought one would think that their request would stand a better chance of consideration if they were using paper manufactured in Canada. Possibly the energetic sales agents of Norwegian paper got ahead of agents of Canadian manufactured paper, but it serves to show how commerce between nations is distributed.

This brings us again to local trade. A business man stated that from his experience he knew of goods being purchased from city houses which could be purchased at the same price as he himself is selling at. He felt it was unfair to himself, as he was paying taxes, helping to support the schools and doing his share to make the town worth while living in. If people lack the sense of fair play in a case such as this man spoke of, loyalty to their home community and neighbors is dead. It simply does not exist.

Everyone has his own rule of living, and no set rules can be applied, for changing conditions and circumstances make it impossible. But whether it be "easy sailing" or "tough sledding," if life be taken not too seriously and one plays the game from day to day, there is always pleasure to be derived from it, no matter how old you may be.

An exchange says: "No man knows the meaning of responsibility until he has carried a silk hat at a wedding."

14th Anniversary of the Battle of Loos

On Sept. 23, 1915, the above battle was fought, in which Scottish regiments distinguished themselves. Though all would rather think of peace than of war, yet the hearts of thousands turn to the war days when they think of many a brave soldier who died "over there."

I saw an article entitled "The Pipes of Loos," published in the Glasgow Evening News on last year's anniversary, appears the following. It was handed to The Journal by Pete Smith, who took part in that battle.

"I knew my friend had served in the 7th Seaforth's, but I wasn't thinking about that when, in the midst of the roar of the city's streets, there came to us the sound of the bagpipes. In a vacant sort

of way my friend suddenly pulled me from the throng and led me by a path into an open court. There for sure was a vagrant piper, and as we listened it was borne in upon me that it was the Calar Feidh the piper was playing.

And I knew without asking that the curtain had been lifted once again for my friend, that he was back thirteen long years, where he lay badly wounded on the long slope towards Lens amid the swaths of mown tartans. The advance was held up, when suddenly out into the open strode two pipers—Fraser and Hamilton their names—and the Calar Feidh went thundering across the world. Forward went the Seaforths over the ground, but Fraser's and Hamilton's pipes were silent for ever, except—

Except in the strange, sweet, wild music that comes to us to-day over thirteen years of days from that great battle of Loos, that last (God grant) addition to the stories of glorious failures. Memories of Loos! But memories sweet as all the wild honey of lost causes borne across in the tunes of the pipes.

ST. ALBAN'S CHURCH

Sun., Sept. 29, (St. Michael and All Angels.) Holy Communion at 11.15 a. m.

The W. A. of St. Alban's church held a most successful whist drive on Monday, Sept. 16, the winners of the prizes being: Ladies first, Mrs. MacNaughton; second Mrs. W. Nelson Gents' first, Allan Brown; second, Mrs. Dickson. These whist drives will continue every second Monday. The next will be Mon., Sept. 30. An aggregate prize will be given at the end of the season.

Thanks are due to Mr. Duffield, senior and junior, for putting up the serial at St. Alban's church. It was unfortunate that the stave was so bad last Sunday evening.

The boys that threw stones at the church and parish hall last week and broke one of the windows are being watched.

The J. W. A. wish to thank all those who assisted at the pantry sale on Sat., Sept. 14.

Big Engines Giving Splendid Results

Much interest is being taken in the placing of the new monster locomotives on the passenger service from Revelstoke through the mountains, according to the Kamloops Sentinel. The 5900 and 5901, as they are known, were sent out on the regular runs last Monday and Tuesday respectively, taking out train No. 14 and returning with No. 1. This schedule is expected to be in force until No. 14 is taken off, when No. 4's run will be substituted.

A test car accompanied the big locomotive and it is reported that

A Scourge

Eastern Ontario is fighting that scourge of youth, Acute Poliomyelitis, (Infantile Paralysis) and both Ottawa and Toronto have had a large number of cases. Quite a few deaths have occurred. This is the most virulent infantile paralysis. There have been a few cases in Alberta within the last month. Now that the children have returned to school, there is daily contact, especially in the country schools, where during the vacation period children are usually widely separated.

If a child exhibits signs of sickness, i. e. fever, running nose, loss of appetite, irritability when touched, he should be isolated for twenty-four hours. In that time whatever disease is incubating will develop. On no account should other children be allowed in contact. The symptoms may develop nothing worse than a bad cold, or it may be measles or scarlet fever, or again it might be Infantile Paralysis. If at the end of twenty-four hours, the child is still sick, a doctor is indicated. Where the whole future of the child may be concerned, it is criminal to run the smallest risk.

Pamphlets on Infantile Paralysis may be had free, from The Canadian Red Cross Society, 407 Civic Block, Edmonton.

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada, it has been announced. Growing commerce between the two countries is given as the reason.

The monoplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Peaceful Arts, in New York.

A young peach tree, bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,156,266 bushels with a valuation of \$14,397,493, according to returns compiled by the Dominion Bureau of Statistics.

The R-100, British dirigible now under construction at Cardington, England, which was expected to make a trans-Atlantic voyage, is expected to treat this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 78, after an illness extending over several weeks.

Lord Ypres, son of the late Field Marshal, plans to leave for the United States shortly to exhibit his paintings. Lord Ypres paints his pictures in a studio built in the garden of his home, Ivy House, built during the reign of William III.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

French Bakers Celebrate

Commemorated Four Hundredth Birthday Of the Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous confection was made in Paris in 1523. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut, we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hoe and molded the doughnut round the vacant space.

Promoting Trade Welfare

Six Apprentice Grocers From Great Britain Now Touring Canada

So that they may know better the Canadian goods they will hand over the counters in their shops in England, and to promote the welfare of trade between the mother country and the Dominion, six apprentice grocers from Great Britain are now touring Canada, under the auspices of the Department of Trade and Commerce, with the co-operation of the Canadian National Railways. They were selected for the tour by an essay competition conducted by the British Institute of Certified Grocers for the Department of Trade and Commerce.

Clue To Unsolved Mystery

McMillan Expedition Finds Trace Of Frohisher Party, Lost In 1878

A clue to an unsolved mystery of nearly 400 years' standing—the fate of five men left on Kadlunian Island by Sir Martin Frohisher in 1576—is reported by Donald B. MacMillan, on his return here from over two months' exploration voyage to Baffin Land.

On an island on Countess Warwick Sound, the famous explorer discovered an ancient stone house which the Eskimos said was the work of white men. Inside were the bones of a bear and other evidence that it had been used as a shelter. The age of the moss and other particulars pointed to the dwelling being contemporary with Frohisher.

Kadlunian was also visited and there the party found, in a very fair state of preservation, the house built by Frohisher in Queen Elizabeth's day. Digging in the earth floor, they discovered some pottery and other relics belonging to that period; also traces of the ship-wreck, down which the intrepid explorers launched the boats they built after their ships were crushed by ice.

It was hitherto supposed that the five men left behind by Frohisher on one of his three voyages made attempts to build a fort to protect the supposed gold mines and had been killed by Eskimos. Careful enquiry among the natives reveals a tradition that the white men were not slain, but built a big boat and set out on their perilous return to England.

The relics now found by MacMillan indicate that they had proceeded only about fifty miles when their frail craft was crushed by icebergs, and one or more escaped ashore and built the shelter in Countess Warwick Sound.

563

UNUSUALLY LOVELY

A charming tulle silk in gay print in red and white coloring, so important for summer wardrobe. Its practicality and sporty-air carries one through an entire day. It can be worn to town for shopping, or to the office, and then to keep luncheon engagement at any fashionable restaurant. It is suitable for Country Club, for the beach or week-end party. Style No. 563 with its gracious flaring skirt with soft gathered fulness creating a cascading draped effect at side, and slightly bloused surplus closing bodice, is most fascinating, made of flowered chiffon for attention. It may be made with the long sleeves or with the sleeves omitted. It is designed in sizes 10, 18 and 20 years, 36, 38, 40 and 42 inches bust. Printed cotton voile, printed lawn, georgette crepe, other attractive fabrics. Pattern price 25 cents in stamps or coin (check is preferred). Wrap coin carefully.

Three Year Old

Makes Long Journey

Little Boy Travels Alone From Liverpool To The Pas, Man.

Albert Pilkington, aged three years, stepped off the Continental Limited in Winnipeg recently, clutching in his hand a ticket that was taller than Albert by many inches, and in the other "Bosco," a mechanical doll, who had accompanied him all the way from Liverpool, Albert, or Bert, as he insists on being called, was en route to The Pas, where his father sent him to be looked after by an aunt upon the death of his mother. He sailed on the SS. Regina, in charge of the captain of that ship, and at Montreal was turned over to the care of George Coagran, Canadian National Railways conductor, who looked after him on the journey from Montreal to Winnipeg.

When the Continental Limited reached Winnipeg, Albert gravely climbed down from the train, shook hands with his friend the conductor, and announced that it was an automobile ride. Bert was promptly accommodated, and when he boarded the train for The Pas, on the last leg of his journey, he gave his opinion that "Boats were very nice, and automobiles were even nicer, but what Bert liked best of all, was 'riding on a train.'" This winter when Albert is in the North he will have the thrill of riding on a dog sled, but until that time the railways have a certain small and enthusiastic booster.

Survey Of Dairy Industry

Data On Dairy Cows In Saskatchewan Soon To Be Available

Making Saskatchewan his headquarters in his survey of dairy industry for the province of Saskatchewan, Dr. George Misner, of the Department of Agricultural Economics, at Cornell University, announced that the actual taking of records will be completed about the end of this month. Figures will then be available on dairy cows on about 500 farms in Saskatchewan. Particular care has been taken to secure a fair average of the herds.

Dr. Misner has been furnished with a staff of assistants in the survey work by the Department of Agriculture at Regina. Although figures as to the cost of producing and distributing milk in Saskatchewan will be ready soon, Dr. Misner does not think this will exhaust the usefulness of the data gathered. He expects the department will have further work when this is completed. The survey is financed from the surplus of the Canada Wheat Board of 1920, which was set aside for agricultural research.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions, a point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By Dr. H. M. T. M. President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could follow down the formulae for combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemist in this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$750,000,000 which produced \$500,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$7,000,000,000.

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

Women In Airplane Factories

Are More Adept At Floor Adjustments Than Men

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc. of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling ribs and fitting them more accurately and in less time than men," he said.

Recipes For This Week

(By Betty Barclay)

CARROT MARMALADE

12 raw carrots.
4 cups sugar.
3 Sunkist lemons.
1 teaspoon ground cloves.
1 teaspoon ground cinnamon.
1 teaspoon ground allspice.
Grate carrots, add sugar and let stand one hour. Add lemon juice and spices. Cook slowly for one hour. Turn into sterilized jars and seal when cold.

SEEDLESS BLACKBERRY JAM

The seeds of blackberries are very objectionable to many, so it is well to get rid of them. Mash berries, cook in their own juice until thoroughly heated then remove seeds by pressing through a fine sieve. Measure pulp and liquid and allow one cup sugar for each pint. Add sugar to pulp and cook rapidly until thick, stirring frequently. Pack in clean, hot jars and seal.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, in the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas is to be undertaken on a more extensive scale within the next few weeks, it is reported.

Served In Rebel Rebellion

Captain H. O. Gray, 74, for years a crack rifle shot on teams representing Canada, died in a hospital at Ottawa. He was a member of the Ottawa sharpshooters during the Rebel Rebellion in 1855. He was a member of the council of the Dominion of Canada Rifle Association.

The man who feels a small job beneath him is invariably too small for a bigger one.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago, Canobie, N.B. writes: "My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I tried many medicines, but he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost half a bottle and he was completely relieved. I have used it for the other children, and my husband and myself. My husband gives it great praise and when he goes away from home to work he always takes a bottle. Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Good Blue Ribbon
REDIABLE TEA

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

SUNDAY SCHOOL LESSON

SEPTEMBER 29

SIGNIFICANCE OF THE EXILE AND THE RESTORATION

Golden Text: "The lovingkindness of Jehovah is from: everlasting to everlasting upon them that fear Him, and His righteousness unto children's children."—Psalm 103:17.

Before the destruction of Jerusalem, the prophet Ezekiel went into exile with the first deportation, and five years afterwards he was called to the prophetic office. It was a severe arraignment of the people of Israel that he was told to make in the name of the Lord. Ezekiel lived up to his responsibility. Do we live up to ours? It is our thing to have convictions, but quite another thing to have the courage of convictions. A responsibility calls for a response. Not to respond to the responsibility that rightfully belongs to us is cowardly and base.

The captivity was God's training school, where the exiles were given an opportunity to lament their rebelliousness and recognize their dependence upon Him. Jeremiah had prophesied that after seventy years were accomplished, God would visit and perform His good word toward them, in causing them to return to their home. The first opportunity for return from exile came in the first year of Cyrus, King of Persia. Jehovah stirred up the spirit of his king to make a proclamation permitting any who wished to go back and have the land of Jehovah.

The chief desire of the returning exiles was to rebuild the temple and re-establish the music formed part of the ceremony, and the joy reigned supreme. But while there was joy in the hearts of the old men who had known the glorious temple of Solomon. They were weeping as well as rejoicing. Life has many such scenes, when the hither mingles with the sweet. One of Tennyson's odes refers to a wedding as "the white funeral of single life." The foundation laying of that second temple in the midst of ruin and devastation was to the old men a "white funeral" of all the glories of the past.

Juveniles To Compete

Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces this year, for which the Canadian National Railways offer prizes and trophies, it was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition, the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent. increase over last year.

Barcelona Taxes Postage

Barcelona citizens have been subjected to various taxes to help defray the enormous expenses of the International Exposition. All letters posted in Barcelona must, in addition to the regular postage, bear an exposition stamp of five centimos (about three-quarters of an American cent). A tax of 1000 centimos is levied for each long-distance call and each telegram originating there.

What Marketing On Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make a investigation of the possibilities of wheat as a protein source in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment—Used for 80 years.

Huge Milk Shipment

Largest Consignment Of Its Kind Shipped From Aylmer To Western Canada

"Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railway car."

Freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,850 cans containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of \$65,000 and is pointed to as a sterling example of an extension of the dairying industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

Take Pride In Canada

Only Necessary To Travel the Length of This Dominion To Stir Up Patriotism

Proud of being a Canadian before he took a recent trip to western Canada, Dr. C. E. Oliver, of Chatham, Ont., is even more proud of his nationality, since he has once more travelled through Manitoba, Saskatchewan, Alberta and British Columbia. The more he sees of the Dominion, the prouder he is of Canada. His patriotism needs no artificial stimulus. All he needs is to see his Canada. Every citizen of this Canadian nation has a perfect right to be proud of his country. The more a person travels in Canada, the more he appreciates the wealth of this land, and the more the Canadian travels in other countries, the more he realizes that in Canada he can find facts and opportunities to equal anything he sees elsewhere.—Border Cities Star.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat, it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

It is estimated that about six or seven persons out of every millior are struck by lightning.

Just place a glass or cup over the open end and the contents will keep perfectly.—Eagle Brand has been the leading baby food since 1857.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part owner of the fashionable Club Bongo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was ardently kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is nearly killed when she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

Al heard Molly's step and turned to embrace her. She softly avoided his grasp, stifling the look of aversion in her eyes as she did so. At thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand. "Sh!" she murmured in an irritated voice. "Don't wake him. I'm tired."

He might cry. Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with what he called his baby. Molly turned away to go to her own room. Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned a smile stealing over her face in spite of herself. There stood Al, pretending surprise that Junior had awakened, but obviously delighted that it had happened. He quickly leaned over, gazed the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Come home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indecision on her face. She wanted to see Junior and cuddle him, too, yet the sight of his innocent baby face at this moment sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered petulantly. "You're spoiling my orchids." Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap,

face; desperately she struggled to think of an explanation that would smooth things over. But it was no use—she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy?"

"A beautiful home—a baby—me?" But Molly seemed to grow harder with every word he uttered. Her icy silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. There was nothing he could say to arouse her—to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"You act as though you didn't love me—any more. Don't you?" At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down. Now she was ready to speak.

"I don't love you any more." The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. "Now—at last—she had come clean. Now, her attitude said, what was he going to do about it?"

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and came echoing back.

But finally Molly could stand the silence no longer. "You heard me!" she exclaimed harshly. "I meant it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a flaming, blinding egg. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to throw him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not know as he listened to her, yet he knew at last that their life and comradeship together were utterly smashed. His face was pale as death. But as they faced each other, eyes agleam, hands clinched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me."

(To Be Continued.)

WHEN BABY IS WELL, MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the home suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again. Mrs. George Keck, Lindberg, Alta., is one of these mothers and she writes as follows: "I am the happy mother of a seven-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels, sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Car Accidents in Iceland

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents. Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto bus took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities halted the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

Kill that corn with Minard's Luluent.

"Are you going to get up and fight? I told you you've got him going."

"That's all right, you tell me when he's gone."

"Electric Man" Puzzles Doctors

Receives Shock When Using Telephone Or Radio Headphones

Frederick Stone, a chauffeur at Holworthy, north Devonshire, England, is so charged with electricity that...

(1) He cannot use a telephone or wear a radio headphone without receiving a shock, and (2) He cannot drive his automobile or walk without wearing vulcanite insulation pads in his shoes, and (3) He can locate buried gold, silver and copper.

This strange "electrical" man has spent 20 of his 49 years in hospitals puzzling doctors. A phone test of his divining powers has been held at Plymouth Municipal Museum under the supervision of the curator. The electric man located without trouble buried nuggets of gold, gold-bearing quartz and even gold jewelry.

Stone finds hidden gold and copper by means of a wand consisting of an ordinary steel clock spring. This wand and wriggles in his hand like a snake when he approaches buried treasure. The number of wriggles denoted the number of feet he is away from the exact spot.

Discussing his unusual gift, Stone said that these divining spells put a great strain upon him and were always followed by periods of intense lassitude.

"The only way I can get relief from the electric currents when I am thus overdone," he said, "is to touch wood."

"I enjoy listening to the wireless by loud speaker, but as soon as I put on a pair of headphones I feel physical helplessness as if I had received a blow on the head. I cannot use a telephone without intolerable discomfort."

once over my wife's wrist watch and it came all to pieces. I must be supercharged with electricity."

Little Helps For This Week

"Watch therefore, for ye know not what hour your Lord doth come."—Matthew xiv. 42.

Think not I dread to see my spirit fly

Through the dark gates of fell mortality; Death has no terrors when the life is true:

"It is living ill that makes us fear to die."

—Omar Khayyam.

When the hour of death comes,—that comes to high and low alike; then it's no what we have done for ourselves, but what we have done for others that we think on amidst pleasantly.

—Sir Walter Scott.

When a man dies, they who survive him ask what property he has left behind. The angel who bends over the dying man asks what good deeds he has sent before him.

—The Koran.

Pity the Editor

A Difficult Matter To Be Popular With Everyone

It is likely editors are the most unpopular people in the world. If they try to please one group, they offend another. If they express honest convictions, which they usually do—narrow critics to the contrary notwithstanding—they are by many misjudged and discredited.

If perchance, at rare intervals, an editor hears of no error that has crept in or feels no assault on his idea of what should or should not be published, he is profoundly relieved—almost happy. He does not need commendation for any meritorious thing he has written or done to make him measurably satisfied with life. All he needs is freedom from the sharp stabs of those who are looking for imperfections or grounds for disagreement. There is no closed season, and often he is lambasted without knowing it, but if he doesn't know it, he is not hurt, and he may even imagine he has escaped by unanimous consent.

We would counsel the young who contemplate journalistic careers to develop thick and tough hides as a preliminary step, and leave behind all desire to run for office, or to win in any other form of popularity contest.—Benson, Minn., Monitor.

The Professor—After your motion for a new trial has been denied what is the next step to take?

The Pretty Girl Student—Id cry a little.

You can take lessons by mail to increase your will power or you can practice getting up at night for another blanket.

Dyeing this way makes faded Dresses NEW

DIAMOND DYES are the finest dyes you can buy. They are made to give you real service. They contain the very highest quality aniline dyes that can be produced. It's the quality of the aniline dyes in Diamond Dyes that give such soft, bright, new-looking colors; that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliance through wear and washings. Next time you have dying to do, try Diamond Dyes. See how easy and simple it is to use them. Then compare results. You will surely agree Diamond Dyes are better dyes. The white package of Diamond Dyes has both packages.

EASY TO USE—BETTER RESULTS

Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York!"

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz Guenther Perle, a 21-year-old Berlin engineer. Perle claims that his plan would make the trip from Berlin to New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

"Table scraps can be converted into many useful things," advises a writer. For instance, if the scrap ends in tears, the little woman can convert it into a spring hat.

Diamond Dyes contain the highest quality aniline dyes that can be produced. And it is the quality of the aniline dyes that give such soft, bright, new-looking colors; that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliance through wear and washings. When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sour. The corrective is a alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 60 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

GMR Cylinder Head 58 h.p. BIG Six Engine Fuel Supply Pump

COMPARATIVE tests . . . made with the "fifth-wheel" speedometer . . . prove Pontiac to have the highest top speed and fastest acceleration of all cars in its price range. Its 200-cubic-inch engine delivers 58 brake horse-power at 3,000 r.p.m. . . exceptional power at moderate engine speed spelling long life for Pontiac's Big Six engine.

High-compression performance, with ordinary fuels is provided by Pontiac's GMR cylinder-head, developed by General Motors Research Corporation, and available in no other car at Pontiac price. Positive fuel-pump assures full supply of gas and prevents starving on long, steep hills.

The only true performance is all-round performance . . . power, speed, acceleration and LONG LIFE. That is why Pontiac is worth more today than other cars at its price. Compare Pontiac's BIG SIX beauty, performance and dependability with anything this price field can offer . . . then make your decision.

Personal and Local

Coal Creek mine is reported to have received a big order which will keep the miners employed for some time.

Mr. and Mrs. J. G. Field, of Tavistock, Ont., are spending a few days with their daughter Mrs. C. W. McKinnon. They had been visiting at Fort William, and decided to come west. They have visited here on previous occasions.

Anderson and McLean, Sight Specialists, of Calgary, wish to announce a regular monthly visit to Coleman at G. R. Powell's office, carrying a complete line of scientific instruments, an optical service equal to that of the city will be brought to you. Date of first visit will be Thursday, October 3rd. Visiting Optometrist, Mr. Melville Anderson. Make appointments at the office.

The most notable feature of the Victor Micro-Synchronous Radio is that the listener can control the performance of the distant artists to suit his own tastes. This is provided through the harmonic modulator, a device which actually enables the listener to emphasize the treble notes and soften the bass or soft pedal the treble while the proportion of bass is increased. This Radio is sold by G. R. Powell, exclusive agent for Victor products.

The clearing of the emergency landing field will be done by Forest Ranger Boulton and a number of men. The work was to have been done yesterday by the Board of Trade, but the snow caused a postponement of this, and as it is hoped to have a plane come down from High River next Wednesday, the work has to be done forthwith. The expense will be met by the Board of Trade members. Several have already handed Secretary Rippon donations towards the expense. Those loaning trucks are International and McGillivray companies, Leosky, Ledieu & Co. and G. Pattinson.

Mr. and Mrs. J. C. Cox returned last Friday from a delightful auto tour which took them as far south as Old Mexico, and they travelled nearly 5,000 miles. They visited the important coast cities and at San Diego, Cal., enjoyed a ride in a cabin airplane from which they viewed the city and surrounding district. At San Francisco they enjoyed a visit with a former Colmanite, Thos. K. Crawford. At Los Angeles and Hollywood they stayed for a day or two and saw some of the fine residences owned by the movie stars, and they also saw in person some of the well-known boys who play in "Our Gang" comedies.
